SUMMARY

Analyst with hands-on experience across data analytics and marketing analytics building Power BI dashboards, automating reporting workflows, and using SQL, Python, and Google Analytics to turn raw data into decision-ready insights. Track record of improving reporting efficiency, optimizing campaign and website performance, and delivering KPI-driven analysis that supports both business and marketing decisions.

SKILLS & CERTIFICATIONS

Business Intelligence: Power BI, Microsoft Fabric, Tableau, Excel

Programming: SQL, Python, DAX, Power Query

Marketing Analytics: Google Analytics, Campaign Performance Analysis, SEO Optimization, Competitor & Content Analytics

Data Analytics: Data Modeling, Dashboard Development, KPI Reporting, Data Visualization, Statistical Analysis, Data Cleaning, Data Transformation, Data Validation, Data Mining

AI & Automation: AI-Assisted Data Analysis, Predictive Analytics, AI-Driven Business Intelligence, Workflow Automation, AI-Driven Decision Making

EDUCATION

Faulkner University **Montgomery, Alabama, US**

Master of Management Science

The University of Texas at Dallas **Dallas, Texas, US**

Master of Information Science

Experience

Marketing Analytics Analyst - Digital Marketing and Campaign Analytics **Aug 2024 - Dec 2025**

University of Texas at Dallas | Insight Global (Atlanta)

- Consolidated Cut reporting time 25% by consolidating 5+ data sources into a unified Power BI model.
- Reduced bounce rate from 80% to 55% and grew organic traffic 25% via SQL-driven site optimization.
- Lifted campaign engagement by 15% and grew Instagram engagement to 5% and LinkedIn followers by 18, measured by platform analytics, by strengthening content strategy through competitor and content analytics.

PROJECTS

Data Analyst - ROSHANI JEWEL Business Analytics Dashboard **May-2026**

Microsoft Fabric | Power BI | DAX

- Improved data accuracy by engineering a Microsoft Fabric and Power BI semantic data model.
- Delivered real-time visibility into sales, profitability, inventory, and marketing performance, measured by 20+ tracked KPIs across 5+ interactive dashboards, by building a centralized Power BI reporting layer with DAX-driven measures.
- Surfaced actionable business insights, measured by identification of top-performing products and inventory risk areas, by applying data modeling and statistical analysis to multi-source transactional data.

Big Data Analytics Specialist - Big Data Analytics and Predictive Modeling **Mar 2024 - May 2024**

Big Data | Predictive Modeling | Hadoop | Hive | Pig | Tableau | Spatial Analysis

- Improved operational efficiency by 30% by processing 1M+ records through Hadoop, Hive, and Pig pipelines.
- Strengthened risk management and decision-making, measured by 15+ high-risk customer segments and 10 geographic hotspots identified, by applying predictive modeling and spatial analysis techniques.
- Enabled data-driven operational decisions, measured by stakeholder adoption of dashboard insights, by building 5+ interactive Tableau dashboards visualizing risk trends and KPI performance.

Blockchain Research Analyst - Blockchain Data and Supply Chain Research **Apr 2024 - Jun 2024**

Data Research | Blockchain Analytics | Smart Contract Analysis | Ethereum | GitHub

- Increased record reliability by an estimated 85% and cut counterfeit risk by 60%, measured by transaction-level traceability outcomes, by analyzing 500+ blockchain transactions across 5+ supply chain stages.
- Strengthened supply chain transparency and transaction validation, measured by successful prototype deployment, by developing a decentralized application (DApp) integrating smart contract performance checks.
- Maintained code reliability via version-controlled commits and documented logic on GitHub.
